

Oniko Lotion; relieves pain of ingrown nails.

Used for:

- ingrown nails of sweaty feet,
- ingrown nails in kids and adolescents,
- ingrown nails with puffy, fat nail sides

Mode of Application:

Open the bottle cover. Fill half of the bottle with warm, still drinking water. Shake or stir till powder totally dissolves. Apply 2-3 drops on the painful nail side by pulling the nail side with your thumb. See the red skin near the toe and drop on top of the area. Wait 15 seconds, then let go the rest of the lotion. Repeat 3-4 times a day. In a few days when pain decreases, apply 1-2 times a day. Go on applying for a week before stopping. Once pain subsides, stop the application.

When the nail sides get white, start applying every other day and wash the white powder with warm clean water before applying.

If pain recurs you may restart application. If you have frequent recurrences of pain after stopping the application, you may go on applying 3-4 times every week.

Warning:

- Do not drink.
- If gets in contact with eyes wash eyes with clean water.
- Make sure children cannot reach the lotion. Keep in fridge door while not using. If pain does not start to ease in 2 days, apply to a doctor.
- Please do not touch the tip of the bottle to your skin.
- Throw away left over lotions, not used within 4 weeks.
- If there is a foul smell when you open the bottle, immediately throw away the lotion.
- If something unexpected happens, apply immediately to a doctor or health center.
